

# Staff Nurse Interest Group of RNAO

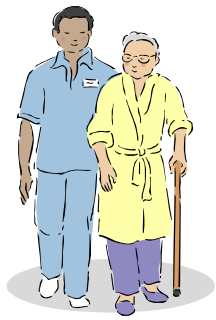

**Caring ~ Advocacy ~ Leadership**

## What is a Staff Nurse?

Staff Nurses work in a wide range of *clinical settings* or specialty areas such as surgical, critical care, maternal-newborn mental health, community/public health, rehabilitation, and family practice.

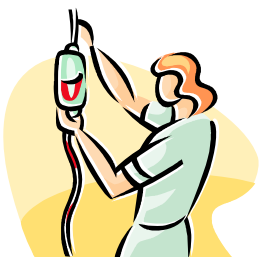

Our vision centres on a commitment to Registered Nurses to articulate the role of the staff nursing in shaping a preferred future and promotion of opportunities for Staff Nurses to participate in the decisions which affect their professional and personal lives and supporting their leadership potential.

The Interest Group has recently undergone many changes, and now includes a brand new executive that are committed to promoting both the role and interests of Staff Nurses. The next year will be very exciting as new changes take place. Join in the excitement, and sign up today!
